## **ECONOMIC SECURITY OF ENTERPRISE AS OBJECT OF MANAGEMENT**

The problem of maintaining security of any enterprise has always been a priority, and the assessment of economic security of a company is gaining increasing importance. Economic security or financial security is the condition of having stable income or other resources to support a standard of living now and in the foreseeable future.

Economic security is a practical category that describes the state of protection of social and economic relations at all levels. For the company the same category means the state of the enterprise security against possible threats and adverse external environment and the ability to adapt quickly to existing conditions that do not adversely affect its operations. The financial mechanism is a set of system building blocks, organic interaction which enables the achievement of key financial goals of the company.

The effectiveness of economic security is confirmed with the operational use of corporate resources and entrepreneurial opportunities that will positively affect the activity of the company – a stable operation and dynamic scientific and technological development, avoidance of internal and external influences and threats.

As the object of management, economic security has certain characteristics of dynamic system, such as flexibility, performance, reliability and manageability. Under the management of economic security system we mean a series of methods and activities of operational and strategic nature, which are used to prevent internal and external threats.

Among measures for economic security we can name:

1. Conducting analysis.
2. Evaluation of external influences on each functional component.
3. System development and developing preventive measures on their basis.

The main factors affecting economic security are economic potential, competitiveness, efficiency of the financial system, innovation, scientific and technological level of development and so on. The stability of operations, safety of personnel and profitability are the results of economic security.
