I. Translate the given words into English.
1. величина
2. дріб
3. ступінь
4. довжина
5. одиниця
6. маса
7. рідина
8. опір
9. провідність
10. потужність

II. Translate the text into Ukrainian.

The ampere is that constant current which, if maintained in two straight parallel conductors of infinite length, of negligible circular cross-section, and placed 1 metre apart in vacuum, would produce between these conductors a force equal to 2×10⁻⁷ newton per metre of length. The original "International Ampere" was defined electrochemically as the current required to deposit 1.118 milligrams of silver per second from a solution of silver nitrate. Compared to the SI ampere, the difference is 0.015%.

III. Give definitions for the following terms.
Metric system, coherent system, Kibble balance

IV. Translate the following sentences into English.
1. At dinner she annoyed me by ________ (laugh).
2. He made us ________ (do) the same things.
3. She apologized for ________ (be) late.
4-5. A: How about ________ (go) to the shops this afternoon?
   B: Great! I need ________ (buy) a new dress for the party.
6-7. A: Dan can’t stand ________ (drive) to work every morning.
   B: Then he should consider ________ (take) the train.
