# SIGNIFICANCE OF ENGLISH IN INFORMATION TECHNOLOGIES

**Zhezhel Y.S., Zhukova K.A.**
*National Aviation University, Kyiv*
*Scientific adviser – Nemlii L.S.*
*PhD, associated professor of Aviation English Department*

English is a common language for all native speakers like British, Americans, Canadians and other nations. However, there are over one billion people in the world who speak it as a second language and use language as a tool for different purposes for example, to do business, to communicate with friends or to travel. That is why, English is concerned a "global lingua franca" and used for international business and telecommunications, newspaper and book publishing, scientific publishing, mass entertainment and diplomacy.

In this article we want to present the results of the research which says that all students of National Aviation university are grateful that they have opportunities to study all disciplines in English as there is an English project suggested for some specialists' education. Future specialists with a high ambition want to work in big companies such as Lenovo or Samsung.

These are two of many others global technology companies. Both of them do their business in English. It is their official language. It means that all staff should know the language at high level to communicate with their partners or colleagues, read necessary literature, work with equipment, understand the software and programs and use the language for other professional aims. Most of Lenovo production is based in China and Samsung is in South Korea. These companies' branches are situated in different parts of the world but all of them have a common language for doing a job. This fact shows the role of English in IT companies. The benefits of this language for our profession are clear. So, students who study at English project at the National aviation university have high chance to apply for an international company and have a good career growth.

Furthermore, English is the language of science, aviation, new technologies, diplomacy and tourism. Having language skills will increase chances of getting a good job in any multinational company. A growing number of multinational technology companies choose English as their common corporate language such as Apple, Hewlett-Packard, Amazon, Microsoft, Google, Intel, Cisco Systems and others. It is done just for making an effort to facilitate communication and improve productivity across geographic regions and business projects.IT is fast-moving industry, so we need to keep up with the latest technologies developments and use the language to discuss them.
