**DEVELOPMENT OF REGIONAL TRANSPORT INFRASTRUCTURE:
DNEPROPETROVSK REGION**

Shmatchenko Anna

National Aviation University, Kyiv

Research supervisor – Olena Konovalova, PhD, associate professor

Key words: transport infrastructure, regional transport, development of regional transport system.

Introduction

Dnipropetrovsk region is one of the parts of Prydniprovsk economic region. Prydniprovsk takes second place in the country by the volume of industrial production and is one of the largest industrial regions of Ukraine. The following types of transport are developed in Prydniprovsk: railway, water, automobile, and aviation. Railway transport plays a leading role in the transport system of Prydniprovsk. The Dnipro significantly facilitates the development of water transport, especially after the construction of “Dniprogess”.

Infrastructural projects in the Dnipropetrovsk region

The budget for infrastructure projects in the Dnipropetrovsk region constitutes – UAH 1.114.082.100

Road transport: the project of building a highway from the Dnieper to the EU is currently being implemented. The Dnipro-Reshetylivka state route is currently being actively built in the Dnipropetrovsk region. In total, more than 50 km of bypass will be built. Air transport: the construction of a new airport "Dnieper" in Solony. The extracts from the plan of implementation of the Strategy of regional development of the Dnipropetrovsk region for the period up to 2027:

Rail transport: the modernization and acquiring of rolling stock, replacement of tracks with European standards, as well as implementation of direct trains to Europe. The replacement of Kyiv-Dnipro with a European standard track. River transport: the implementation of the project of technical assistance "Promotion of transport development of the Dnieper River".

Conclusion

Taking into account all the information above, we can make the conclusion that the transport infrastructure of the Dnipropetrovsk region is quiet undeveloped, especially talking about the air transport. However, the situation is going to be different, as planned projects will bring the bright future and changes for the best in terms of transport infrastructure.
