Екзаменаційні білети
з дисципліни «Іноземна мова (за професійним спрямуванням)»
за спеціальністю 113 «Прикладна математика»
спеціалізація: «Прикладна математика»

Розробник:
Ст. викладач Березнікова Н.І.

Екзаменаційні білети розглянута та
схвалено на засіданні кафедри іноземних
мов і прикладної лінгвістики

Протокол № 9 від «13» 09 __ 2017 р.

Завідувач кафедри
______________ О.Г. Шостак
I. Read and translate the following text into Ukrainian:

Software is the term for computer programs – the instructions that cause the hardware to do work. Software as a whole can be divided into a number of categories based on the types of work done by programs. The two primary software categories are operating systems (system software), which control the workings of the computer, and application software, which addresses the multitude of tasks for which people use computers. System software thus handles such essential, but often invisible, chores as maintaining disk files and managing the screen, whereas application software performs word processing, database management, and the like. Two additional categories that are neither system nor application software, although they contain elements of both, are network software, which enables groups of computers to communicate, and language software, which provides programmers with the tools they need to write programs.

II. Give definitions to the following terms:
*bitmap images, digital images, vector graphics*

III. Write an essay of 10-12 sentences to answer the questions:

What do you know of computer memory for PC and system network? What are the reasons the software so popular today? Who uses presentation software? What purposes do you use the Internet for?
